## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Sedlak.

Sedlak's Fig. 6(b) illustrates both an apparatus and a method for performing a modular multiplication by determining  $l$  multiplication shift values by means of a multiplication-lookahead method (the block labeled GEN\_Mult\_LA), determining  $l$  reduction shift values by means of a reduction-lookahead method (the block labeled GEN\_Mod\_LA), applying the  $l$  multiplicand shift values and the  $l$  reduction shift values... to obtain the  $2l+1$  operands (the blocks labeled SHL Z and SHL N) and combining the operands (the block labeled Z: =). Note the  $l$  is defined as being "larger or smaller than 2".

### *Specification*

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
4. Page 4, lines 21-22; "figure 9" and "figure 8" should be "Figure 8" and "Figure 9", respectively.
